

Safety Management System

+ Build, Implement, and Sustain Safety Excellence

Executive Summary

Strong safety performance requires more than compliance. It demands a comprehensive safety management system that integrates into company culture, addresses specific operational risks, and drives continuous improvement. OnPoint's Safety Management System solution provides a customizable framework that helps organizations build, implement, and sustain lasting safety excellence. Structured as an annual renewable partnership rather than a one-time audit, our approach ensures your safety system evolves with your operations and delivers sustained performance improvement.

The Integration Advantage

Most companies contract safety audits, training programs, and compliance consulting as separate one-time services. Audits identify gaps but don't implement solutions. Training addresses immediate needs but lacks systematic workforce development. Compliance efforts meet minimum requirements but don't drive cultural change.

OnPoint integrates all safety management system elements into a cohesive, sustained partnership where:

- Management commitment translates into leadership engagement through structured programs that make safety leadership visible and accountable at all organizational levels
- Program development aligns with OSHA requirements while exceeding minimum compliance to create frameworks that manage risks and improve overall operational performance
- Training programs build workforce competency systematically with structured development that creates lasting capability rather than checking compliance boxes
- Continuous assessment identifies emerging gaps through safety surveys, field assessments, and performance tracking that keeps the system current with evolving operations

Result

Safety becomes integrated into company culture. Performance improves sustainably. The system evolves with your operations through ongoing partnership.

At a Glance

Customizable framework

tailored to specific operational needs

Beyond compliance

focus integrates safety into company culture

Annual partnership

ensures continuous improvement and evolution

Comprehensive approach

covering all SMS pillars and core elements

Core SMS Components

Management Commitment & Leadership Engagement

Structured programs that translate executive commitment into visible leadership throughout the organization

Program Development & OSHA-Aligned Documentation

Comprehensive safety frameworks that meet regulatory requirements while exceeding minimum compliance

Training & Workforce Development

Systematic competency building that creates lasting capability across all organizational levels

Safety Surveys, Field Assessments & Gap Analysis

Continuous assessment identifying emerging risks and opportunities for improvement

Continuous Improvement & Performance Tracking

Regular monitoring, evaluation, and refinement driving sustained performance improvement

Strategic Business Outcomes

Build Safety Into Company Culture

Compliance-focused approaches create checkbox safety that doesn't change behavior or reduce incidents. OnPoint's SMS integrates safety into company culture through management commitment, leadership engagement, and systematic workforce development. The result is safety that employees embrace rather than tolerate, creating lasting behavioral change that reduces incidents and improves operational performance.

Achieve Sustainable Performance Improvement

One-time audits identify gaps but don't drive sustained improvement. OnPoint's annual renewable partnership structure ensures continuous monitoring, evaluation, and refinement of safety performance. Safety surveys and field assessments identify emerging risks before they cause incidents. Performance tracking demonstrates improvement and identifies areas requiring additional focus. The continuous improvement cycle creates trajectory toward safety excellence rather than episodic compliance efforts.

Reduce Total Cost of Safety Management

Managing separate safety consultants, training providers, and compliance auditors creates redundancy and gaps. OnPoint's integrated SMS provides all core elements through a single partnership. Customized frameworks address your specific operational needs without paying for generic programs. Proactive hazard identification and risk management prevent costly incidents. The result is comprehensive safety management at lower total cost than fragmented approaches.

Industries We Serve

Energy & Utilities

Refineries, petrochemical plants, power generation, pulp & paper mills

Manufacturing & Materials

Steel production, automotive assembly, pharmaceutical manufacturing

High-Tech Infrastructure

Data centers, semiconductor fabs, large-scale construction projects

Construction

General contractors, specialty contractors

OnPoint.

Ready to build a **comprehensive** safety management system?

Schedule a safety management system consultation. We'll assess your current approach and develop a customized framework to drive sustainable safety excellence.
